

KARAKTERISTIK REMAJA TENTANG CYBERSEX DI MEDIA ONLINE

Juliana Mauliku¹

Abstract: *This time, the issue of free sex in Indonesia, especially among teenagers has increased because of information media, for example is the internet, that always talking about sexuality. The purpose of article : 1) to make the parents watch the children using internet, 2) for teacher and observer of youth explain to adult about good and bad things of porn pictures or something about sex in internet. The sense of curious teenagers about sex in the media online is known as cybersex. Cybersex potentially can increase the crime of sex. Internet makes the users addicted to pornography since the users are always looking for more information about pornography. For example, to satisfy the sexual needs, addicts will find the hotter sex material and cybersex addicts feel powerless to leave the consumptive behavior. That can be harmful for teenagers who use the internet, such as lowering the concentration and motivation to study; difficulty establishing healthy personal relationships; cause bad thoughts and immoral behavior; stimulate sexual desire; sexual perversions, such as rape; unwanted pregnancy; premarital sexual behavior that can increase sexually transmitted diseases and morbidity and mortality in adolescents. This time, the development of technology improving the curiosity of adolescents about new things, so that the adolescent will so addicted to the internet. As a result, teens can easily access cybersex. Hard corn porn (real erotic dish) which is found on the internet, are not found in magazines, newspapers, and other media. That's mean; pornography in internet is more attractive than in other media. Internet makes youth more familiar with sex that ultimately lead to the desire to have sex. Parents, teachers, and observers of youth are expected to guide and monitor every activity of the teenagers, so that the internet abuse can be controlled. The conclusion is from internet the teenagers will get a lot of information about sex and they want more to know about sex.*

Keywords: *knowledge; teenagers; cybersex.*
